SYNOPSIS AND GOAL

EWSDN has been focusing during the last years in bringing together, in a highly interactive event, researchers and practitioners at the leading edges of software-based networks, following a rather practical approach and seeking for being useful to establish links, technical exchanges and interactions among the community in Europe and beyond.

CONTRIBUTIONS TO THE WORKSHOP

Demos
Authors from industry and academia are encouraged to present novel prototypes corresponding to relevant topics of the workshop. This includes the full spectrum from work-in-progress prototypes to ready-to-us “products”. The submission of a two-page concise description of the work is solicited. Authors are encouraged to provide a pointer to a short video illustrating the running demo. If the submitted paper is accepted, a live demonstration is to be arranged during the assigned session. Wired connectivity will be provided for demos.

Posters
Ongoing research activities can be presented as posters. This is an excellent opportunity to initiate fruitful discussions and to get useful feedback from EWSDN participants. A two-page paper clearly summarizing the work is solicited. In case of acceptance, an A0 paper size poster is to be prepared and presented at the workshop, which visually describes the work.

Generally, we are interested in the following topics:
- Advancements in SDN technology
- SDN and NFV
- Interaction with legacy networks
- Applications and SDN
- Education and SDN/NFV
- Experimentation and deployments
- Industry and SDN
SUBMISSION AND PUBLICATION
EWSDN papers must follow the CPS Conference Style, A4 format, up to 6 pages, double column, and 10pt font. Please use standard CPS conference proceedings templates in A4 format. EWSDN paper submission will be managed using the EasyChair submission system. Submissions for Demo & Poster contributions will be peer-reviewed and submitted for indexing and publication to Xplore.

COMMITTEE AT A GLANCE

General Chair  
Eduardo Jacob, University of the Basque Country, Spain  

TPC Co-Chairs  
Rui Aguiar, Universidade de Aveiro, Portugal  
Eiji Kawai, NICT, Japan  

Demo and Exhibition Chair  
Jon Matias, University of the Basque Country, Spain  

Local Operations Co-Chair  
Nerea Toledo, University of the Basque Country, Spain  
Mario Druse, EICT, Germany  

Local Organizing Chair  
Maider Huarte, University of the Basque Country, Spain  

Web Chair  
Mario Druse, EICT, Germany  
Umar Toseef, EICT, Germany
